

BUMPA-BAR

Bumpa-bar is a heavy duty guard rail system designed for use around industrial complexes and carparks, etc., for the protection of buildings, equipment and pedestrians from moving vehicles and fork lifts.

The heavy duty 90mm rails and 140mm posts are finished in safety yellow powder coat. Posts are available in surface mount or in-ground, while the rails come in three convenient lengths.

Buyers interested in this product should also look at Shock Absorbing guard rail, Section 3.2.

Value Features:

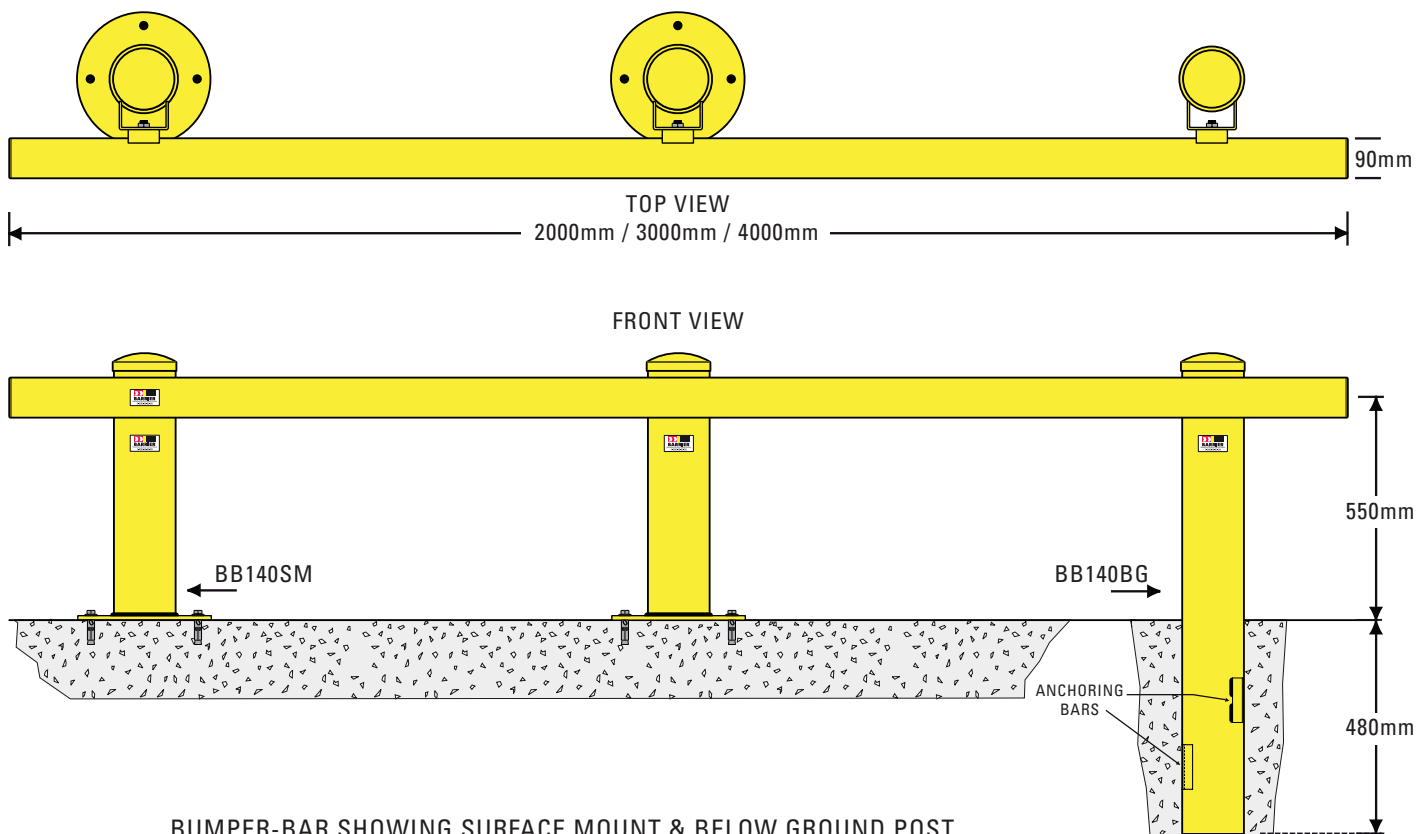

- » Tubular construction means no sharp edges for pedestrian safety.
- » 90mm rails and 140mm posts, all with 5mm walls.
- » 10mm thick base plates. (Surface mount).
- » Available in kits or individual components.
