

## FLEXIBLE BOLLARDS – One Piece Flexi

A highly visible flexible polyurethane bollard that is virtually indestructible. Bright orange finish with reflective bands for increased night visibility. Use for lane delineation or identifying hazards, particularly in tight driving situations such as car parks etc.

### Value Features:

- » Durable one piece moulding.
- » Virtually indestructible (will not break or split).
- » Rebounds after impact.
- » Built in reflective bands.
- » Available in 2 handy sizes.

PART No.	DESCRIPTION
FBP450	Plastic flex bollard 80 x 450mm
FBP800	Plastic flex bollard 80 x 800mm

## SECTION 5.12.2

## FLEXIBLE BOLLARDS – Two Piece Knockdown

Knock down bollard with an elasticised joint for temporary or permanent delineator applications. Removable bollard post twist locks into base. Post comes with reflective bands. The bollard is manufactured from fluorescent orange polyethylene. The rubber base is easily installed with epoxy or masonry anchors.

### Value Features:

- » Soft, lightweight bollard takes the knocks without causing damage to vehicles.
- » Strong elasticised joint ensures bollard returns to upright position.
- » Bollard can be removed from base.
- » Reflective bands for greater night time visibility.

PART No.	DESCRIPTION
KDB1000	Knockdown bollard 100 x 1000mm
KDB1000B	Replacement base
KDB1000T	Replacement bollard

## SECTION 5.12.3

## FLEXIBLE RUBBER LANE SPLITTER

Lane splitters are ideal for better vehicle control in confined areas or wherever there is a possibility of confusion.

The 280mm high rubber flag is finished in red with class 1 reflective panels recessed into its surfaces on both the front and back.

The large base size of 210 x 150mm ensures good adhesion to the road surface using a suitable 2 part epoxy adhesive.

### Value Features:

- » Reflective panels for low light visibility.
- » Durable rubber construction.
- » Easily installed using 2 part epoxy.

PART No.	DESCRIPTION
LS280	Lane splitter 280 x 115mm (flag)
