

Steel Speed Hump Heavy Duty

Designed for seriously heavy vehicle applications such as B-Double trucks and buses. Perfectly suited to transport depots, factories and terminals. Our super strong chassis construction with 6mm floor plate and 6 bolt fixing makes our Slo-motion heavy duty speed hump virtually indestructible. Does not require a rubber underlay to prevent rattle.

Heavy duty steel construction is suitable for constant truck and bus traffic.

PART No.	DESCRIPTION
SM1000HD	Slo-Motion heavy duty steel speed hump 1 metre (23.8kgs) – Black/Yellow
