

Gallery Barriers

Galleries, museums, showrooms and exhibitions all share a common need to separate the viewing public from valuable artwork. The Gallery Barriers in our Neata range are deliberately discreet while being manufactured to the very high standard befitting such spaces. The machine polished 304 grade stainless steel portable post and base units, combined with 4.5mm elastic cord and a range of accessories ensures Gallery can be configured to meet any requirement.

Unique Cord Locking System

The unique cord capture system ensures that the discreet elasticated cord is always kept under constant tension, while the captive locking cap cannot be removed if tampered with. Simplicity of operation also means Gallery can be quickly set up without the need for any tools.

Unlock

Twist and lift the cap to unlock it from the post.

Capture

Position the elasticated cord in the grooves on each side of the post.

Lock

Lower the cap to the post and twist to lock.

Gallery Posts Portable

Choose from either 450 or 900mm tall post and base units. Machine finished from 304 stainless steel, the posts are 32mm in diameter with a 250mm diameter Slimline base. Our unique cord locking system keeps the discreet elasticated cord under constant tension. **Note:** In-floor and surface mount Gallery models are also available on request. See page 104 for a range of elasticated cords.

NG900SL-SS Slimline portable post 900mm

Gallery Posts In-Floor

Permanent but removable posts with constant clean lines and zero tripping hazards. This is the ideal clutter-free system that never needs alignment or adjustment and delivers maximum access and clear floor space for wheel chairs and strollers.

Gallery Posts Surface Mount

Designed to be securely fixed to any surface including timber floors.
