

### GATE CONNECTOR PIN

The gate connector pin is used to connect the outer vertical edge (non-hinged side) of an upper and lower De-Fence panel so that they swing together as one when converting fixed panels into a gate. The pin simply fits into the existing plastic bushes in the panels thereby connecting them. It is made from zinc plated mild steel.

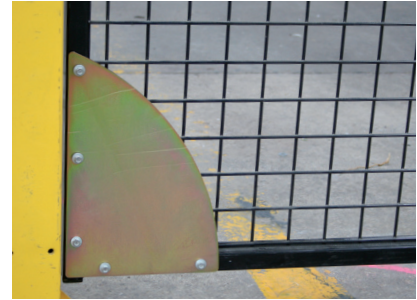

PART No.	DESCRIPTION
DF-CP	De-Fence gate connector pin

### PANEL JOINER

The panel joiner is used to connect both sides of 2 panels together to form one larger panel. Each aluminium extrusion is inserted 150mm into the ends of both the upper and lower panel frames and secured by 2 self-tapping screws (supplied). The panel joiners are sold as a kit containing 2 x 300mm long joiners and four screws, they are made from mill finish extruded aluminium.

PART No.	DESCRIPTION
DF-PJ	De-Fence panel joiner extrusion

### GATE KICK PLATE

Often when people approach a gate they will kick the gate open rather than pushing it by hand. The gate kick plate reinforces the bottom corner of the gate and is secured in place by five self-tapping screws (supplied). The gate kick plate is made from zinc plated mild steel. It measures 300 x 200 x 3mm.

PART No.	DESCRIPTION
DF-GKP	De-Fence gate kick plate

### GATE STOP

The gate stop is fitted to the gate frame and secured in place by self-tapping screws (supplied) it provides a controlled stopping point for spring assisted gates. It can be used on both inward or outward swinging gates. The gate stop is made from durable moulded plastic.

PART No.	DESCRIPTION
DF-GS	De-Fence gate stop

### LOCKABLE DROP BOLT

Used mainly on double swing gates the lockable drop bolt secures one gate in place and allows the other to be latched to it. The bolt simply fits into a drilled hole in the floor, supplied with 2 keys it can be locked in the open or closed position. It is made from durable moulded plastic and zinc plated steel.

PART No.	DESCRIPTION
DF-LB	De-Fence lockable drop bolt

### LOCKABLE GATE LATCH

Used on single swing gates or double swing gates with the lockable drop bolt, the lockable gate latch acts as a quick lever action gate catch or can be locked to deny entry. Supplied with 2 keys and fixings. It is made from durable moulded plastic and zinc plated steel.
