

Compliance Wheel Stops

Designed to comply with AS/NZS 2890.1:2004 and manufactured from high-tech Linear Low Density Polyethylene (LLDPE) with sustainability in mind. Compliance is available in four standard U.V. stabilised colours – Yellow for increased visibility and pedestrian safety, Blue for highlighting disabled parking spaces, Grey for a concrete-like finish and now an economical recycled Black. Four fixing points for maximum hold-down.

Add a fixing kit to your order from our range of options that allow for various installation requirements.

Not recommended for gravel or loose surfaces.
