## Mezzanine Roll-Over Gate

The Roll-Over Mezzanine gate works on the simple principle of an evenly weighted pivoting frame. When one side is open the other is closed. It is available in two standard sizes but can be customised if necessary. Features include a dampened operation to take out any sudden movement.

**Note:** Flat packed for delivery, assembly required.

PART No.	DESCRIPTION	Width x Depth
MZR1515	Roll-over mezzanine gate 1500 x 1500mm (84.5kgs)
