

KRG Series Traffic Lights

LED Traffic Light Dual Aspect LED unit containing ninety high intensity 5mm LED's producing a very bright output with minimal power consumption and long life. This traffic light is ideal for indicating if a traffic lane is open or closed to traffic at weigh bridges, loading docks and toll plazas. The unit is dust proof and weather proof (IP65). The LED's are available in the standard colours of red, yellow and green as well as blue and white by special order. Traffic lights come in single, dual and triple aspect models. Traffic lights are available in 24V or 240v versions.
