

Surface Mount Removable Bollards

Surface Mount Removable Bollards are fabricated from 5mm wall thickness steel. The bollards are galvanised and then powder coated safety yellow. Custom powder coat colours are available. Surface mount removable bollards come with a steel receiver shoe that is bolted to the floor. The post is then locked into the receiver shoe or removed to allow for access. The Surface Mount Removable Bollard is not a security bollard and should only be used for light traffic control applications.

The bollards are available in a Cam-lok uses a Bi-Lock security key. Where the customer selects the Cam-lok model 2 keys are supplied per order. The Cam-lok model bollard is also available in a 316 grade stainless steel finish with a folding 316 stainless steel handle.

Part No.	Description
