Manual Retractable Security Bollard

The KR900 Retractable Security Bollard is great for controlling road way access and to protect assets with the convenience of having the bollard retract into the ground with needed to be removed or stored away.

The robust KR900 is a market leading bollard. 114mm in diameter and locks both in the extended up and retracted down positions. The KR900 is fabricated using mild steel that is hot dip galvanised and then powder coated finish. Custom colours for the KR900 are available at an additional cost.

The below in ground casing is galvanised to protect in against corrosion. The top of the bollard has a 316 stainless steel handle and one reflective band to increase night time visibility.
