

KELRYAN

Shock Absorbing Bollard

These KSHOCK series bollards look like an other ordinary bollard, but they are, in fact, flexible. The bollards come with an internally welded, steel spring which allows the bollard to flex on impact, absorbing the force of the collision and minimizing damage to the bollard.

Ideal for areas with a mix of foot traffic and vehicle access, our sturdy and functional bollards will surely bring extra assurance and safety for loading docks, car parks and driveways. These bollards are ideal for locations where collisions with vehicles occur on a frequent basis.

- Bollard returns to vertical position after impact
- Absorbs proportion of impact force
- Ideal for frequent impact locations
- Greatly reduces damage to concrete surface
- Highly visible safety yellow colour

Part No.	Description
KSHOCK90	90mm Shock Absorbing Bollard - HDG+P
KSHOCK140	140mm Shock Absorbing Bollard - HDG+P

Specifications

Description	Shock Absorbing Bollard
Height	1000mm & 1300mm
Diameter	90mm & 140mm OD
Flex	20 Degrees
Weight	10kg & 20kg
Material	Galvanised Steel
Finish	Powder Coated Safety Yellow
Warranty	1 Year
